

Abdullah Tayyab -

IT Professional & Web Developer

Address: Nankana Sahib (39100)

Phone: +92 324 0096098

Email: contact@abdulahtayyab.dev

Nationality: Pakistani

Professional Summary:

Full-stack MERN developer and IT operations practitioner who bridges web development and systems support. As an independent (indie) developer I design and deliver user-centered web apps and PWAs (React, Node.js, MongoDB). Paired with hands-on front-office IT and records management experience — including troubleshooting networks, automating routine tasks, and earning multiple commendations for reliability.

Employment History:

Jul, 2021 – Present

1. **Front Desk Officer at Punjab Police**

Front Desk Officer (**Police Station Assistant**) — managed front-office operations and digital records, supporting IT and administrative workflows.

- Maintained PSRMS/CMS: data entry, indexing, access control, and secure archival to improve record retrieval.
- Configured and troubleshooted office IT equipment (printers, scanners, network access) and assisted staff with software issues to minimize downtime.
- Designed and maintained spreadsheets and templates; implemented basic automation (macros/scripts) to streamline routine reporting.
- Recognized with **Commendation Certificate-III** more than 10 times for outstanding service and reliability.

Jan, 2025 – Present

2. **Independent Developer**

Indie dev — design and deliver web applications and tools for clients and personal projects, focusing on maintainable code and user-centered interfaces.

- Built full-stack web applications using React, Node.js, and MongoDB; implemented responsive UI, RESTful APIs, and secure authentication.
- Managed deployments and server environments; used Git for version control and automated build/deploy workflows.
- Produced documentation, wrote unit/integration tests, and maintained project road-maps to ensure reliable ongoing support and iteration.
- **Projects:** Aafiyat (Clinic Management System), Nanakan Home Care.

Education

Apr, 23 – Nov, 26

Virtual University of Pakistan

BS Computer Science

Relevant coursework: Data Structures & Algorithms; Databases; Web Development; Software Engineering; Operating Systems; Computer Networks.

Selected projects: Built a full-stack web application (React, Node.js, MongoDB).

Projects:

1. Aafiyat (Clinic Management System)

Stack: Electron.js, Node.js, Express.js, SQLite, Supabase

- Architected a cross-platform desktop application utilizing an Offline-First philosophy with a hybrid SQLite (local) and Supabase (cloud) data synchronization engine.
- Engineered a multi-role ecosystem for Admins, Doctors, and Receptionists featuring SOAP clinical notes, appointment scheduling, and automated billing modules.
- Developed a companion Patient PWA to allow seamless mobile access for patients records and real-time appointment booking.

2. Nankana Home Care

Stack: JavaScript, Express.js API, IndexedDB, Supabase, PWA

- Developed a 4-tier Progressive Web Application (PWA) focused on high-resilience healthcare delivery for local communities.
- Implemented client-side data persistence using IndexedDB for offline functionality, backed by an Express.js API and Supabase for cloud storage.
- Integrated a real-time Blood Bank Management System and a live appointment engine to streamline local patient record-keeping and billing logistics.

3. Smart Tile Inventory Management System

Stack: Next.js, Node.js, MongoDB (*University Final Year Project*)

- Engineered a comprehensive inventory and e-commerce ecosystem designed to manage complex business logic across multiple physical warehouse locations.
- Developed a dynamic product catalog and an end-to-end shopping experience utilizing Next.js for server-side rendering and SEO optimization.
- Designed a scalable NoSQL schema in MongoDB to handle high-volume inventory tracking, stock alerts, and multi-user administrative roles.

Skills

Web Development - MERN Stack

Problem Solving

PWA Development (Responsive)

Communication

System Design & Algorithms

Frontdesk Ops

Languages:

Urdu – Native

English – Proficient
